

# iPad Apps

The following SAM-based programs have iPad Apps:

- READ 180 Next Generation Stage A
- READ 180 Next Generation Stage B
- READ 180 Next Generation Stage C
- System 44 Next Generation
- Reading Inventory
- Reading Counts
- Phonics Inventory
- rSkill CC
- iRead
- MATH 180 Course 1
- Math Inventory
- FASTT Math Next Generation

After downloading the App from the App Store, it must be configured to connect to your server. Each App must be configured.

1. Tap Settings

2. In Settings, scroll down on the left until you see the Apps listed. Tap the first App to be configured.

3. On the right, enter the Site ID for the server (if entering a Hosted Sever Site ID be sure to enter the correct number of zeros).

4. Tap on the next App and enter the Site ID again for that App. Each App needs the Site ID set.

5. If a configuration error comes up when the App is launched, the Site ID is not set correctly. Go back into Settings and enter the Site ID for that App again.

6. If an App prompts for access to the microphone, tap Allow (READ 180 NG, System 44 NG, and iRead have student recording activities).
